PANKAJA JAGDISH KULKARNI

DevSecOps Engineer | Cloud Engineer | Cloud Security

Azure | AKS | Kubernetes | DevSecOps | CI/CD | AZ-104 Certified

Pune, India | +91 7045149611 | pankajajagdishkulkarni@gmail.com | linkedin.com/in/pankaja-jagdish-kulkarni | github.com/Pankajajagdish | pankajajagdish.github.io

PROFESSIONAL SUMMARY

DevSecOps and Cloud Engineer at Amdocs delivering Azure and AKS platform reliability, cloud security, and automation for a telecom mediation platform. Built 8 internal tools that reduced manual operations effort by 40–90% and cut MTTR by 40%. Hands-on with Azure Policy, Microsoft Defender for Cloud, Entra ID RBAC, Terraform, Prometheus, Grafana, Azure Monitor, and GitHub Actions. Microsoft Certified: Azure Administrator Associate (AZ-104).

TECHNICAL SKILLS

Cloud & Platform: Microsoft Azure, Azure Kubernetes Service (AKS), Terraform, AWS, Cloud Engineering, Virtual Networks (VNets), Private Endpoints, Key Vault, Azure Storage, Azure SQL, Managed Identity, Infrastructure as Code (IaC), Azure Resource Manager (ARM), Cost Optimization

DevSecOps & Security: CI/CD, GitLab CI/CD, AWS IAM, AWS GuardDuty, AWS CloudTrail, AWS Config, NIST, Azure DevOps, Ansible, Jenkins, DevSecOps, Cloud Security, Site Reliability Engineering (SRE), GitHub Actions, Docker, Helm, Microsoft Defender for Cloud, Azure Policy, Security Compliance, Entra ID, RBAC, IAM, PAM, MFA, CIS Benchmarks, CVSS, Vulnerability Management, NSGs, S3 Security

SRE, Scripting & Automation: Kubernetes, Grafana, Linux, Node Pools, HPA, Prometheus, Azure Monitor, Log Analytics, Observability, MTTR Reduction, Shell Scripting, Python, SQL, PostgreSQL, Git, Azure Functions, GitHub Copilot, Cursor IDE, Generative AI, AI Agents, MCP

PROFESSIONAL EXPERIENCE

Amdocs | Software Developer

Pune, India | August 2024 – Present | Cloud, DevSecOps & SRE

OneMediation — Telecom data processing platform on Azure / AKS

- Drove Azure security compliance using Azure Policy, Defender for Cloud, and Entra ID RBAC on production subscriptions; weekly reports accelerated audit readiness and cut vulnerability triage time by 50%.
- Operated AKS clusters and node pools — tuned workloads, validated node versions pre-upgrade, and automated pod recovery for CrashLoopBackOff/OOMKilled; reduced MTTR by 40% and improved platform efficiency by 25%.
- Hardened Azure networking (VNets, NSGs, Private Endpoints, AMPLS) and executed AWS security reviews (IAM, S3, CloudTrail, GuardDuty) to align cross-cloud controls; improved incident resolution by 30%.
- Built and maintained CI/CD pipelines in Azure DevOps, GitHub Actions, and GitLab; pipeline optimization contributed to ~15% lower Azure infrastructure cost.
- Deployed observability with Prometheus, Grafana, Azure Monitor, and Log Analytics — increased coverage by 35% with MS Teams alerts for on-call response.
- Developed Python automation for PAM SLA tracking, daily health reporting, and Jira–Confluence sync; eliminated up to 90% of manual reporting and access-review effort.

TOOLS AND AUTOMATION BUILT

Vulnerability Comparison Tool — NIST/CVSS scan comparison; remediation prioritization improved 50%.

AKS Node Version Compliance Tool — Pre-upgrade validation; manual checks reduced 60%.

Daily Health Report Agent & Git Release Diff Analyzer — Automated ops reporting and release comparison.

Azure Cloud Security Auditor — Defender, Azure Policy, Storage, Key Vault, and NSG audit automation.

Azure Cost Governance Reporter — FinOps spend by resource group, untagged resources, CSV export.

Atlassian MCP SSO Toolkit — Confluence and JIRA SSO MCP servers for Cursor IDE.
